Protecting Your House of Worship

Safeguard Risk Solutions Sets the Standard

Conduct a Security and Vulnerability Assessment

Safeguard Risk Solutions specializes in security and vulnerability assessments to help churches, synagogues, and mosques calculate risk and reduce liability.

Develop Up to Date Emergency Response Plans

Comprehensive Emergency Response Plans, including protocols for various scenarios such as fire, medical emergencies, or active threats, should be regularly reviewed and updated with a team of safety professionals.

Provide Training to Staff and Volunteers

Educating personnel on recognizing suspicious behavior and responding effectively to emergencies by following Emergency Response Plans is essential for maintaining a secure environment.

Perform Regular Safety Drills

Practicing evacuation procedures and response protocols detailed in an Emergency Response Plan ensures that staff and volunteers know what to do in the event of an emergency.

Incorporate Technology to Improve Safety

The affordable Mobile Emergency Response Plan (MERP) enables administrators to transition emergency plans from the traditional three-ring binder stored in the business office to the mobile devices of every employee or volunteer.
